EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Alan Linkin on 12-14-2004.

The application has been amended as follows:

Cancel claims 1-4 and 7-10.

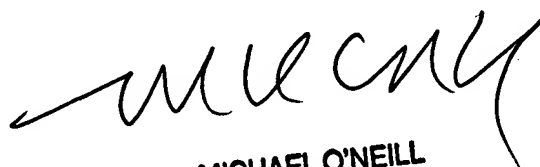

46. (currently amended) A video game processing method enabling a plurality of players to participate over a network and controlling a battle between a plurality of player characters each controlled by a player and at least one enemy character, a program stored on a medium causing a computer, on the network, having a display screen to execute the method comprising:

calculating data determining an action sequence for each character based on specific information about the character when the battle is begun, the specific information stored with a correlation to each of the characters;

Art Unit: 3713

comparing the data calculated for each character;
determining an action sequence for the characters according
to a result of the comparison; and
displaying the action sequence, from the character in the
current action to the character acting a number of turns after
the current character, in a specific window on the screen.

This Examiner's Amendment is being done to clarify the
invention as a process being executed by a computer so that a
plurality of players can play the video game over a network
wherein in the step that defines the claimed invention over the
prior art of record is displaying the action sequence, from the
character in the current action to the character acting a number
of turns after the current character, in a specific window on
the screen. Analogous reasoning is applied to the other allowed
independent claims.
